

## Coffeemaker

### Product description

---

- Material: (case and basket filter holder) stainless steel
- Incl. Stainless steel insulated pump jug 2.2 liters (inside glass and outside stainless steel)
- Brewing time approx. 5 - 6 min.
- Dry run protection
- Weight: 9 kg
- Dimensions: W 195 x L 360 x H 550
- Content: Pumping jug: 2.2 liters
- Connection: 230 V - 50 Hz - 1.9 kW

## How to brew coffee

 Never fill in water without immediately brewing coffee. Flooding can occur if the tank is filled again afterwards!

1. Place the empty **coffee pot** on the machine without the **pumping rod**.

2. **Turn on** the coffemaker. If water has already been added, it will start running through.

3. Put a **coffee filter** in the filter pan.

4. Add **8 measuring spoons** in the coffee filter. Use the correct spoon.

5. Attach the **filter pan** to the machine.

6. Fill the provided **measuring cup** with water to the 2 liters mark.

7. Pour the content of the measuring cup into the **water reservoir**.

8. After the coffee is ready, place the **pump stick** in the coffee pot.

9. **Enjoy your coffee!**
