Christopher Osborne commented "**Coffee too strong**"

The amount of powder does not increase linearly with the amount of water. See for example the article here: <https://fellowproducts.com/blogs/learn/the-golden-ratio-for-brewing-coffee>

Talk:Coffeemaker

Coffee too strong

The coffee has been a bit strong so far, could we do a test run with less coffee powder?

Well. 6 grams of coffee per cup says the instructions. And the amount of powder increases linearly with the cups. By the way: If you squeeze out the last cup of coffee, you should cook a new one right away.

The amount of powder does not increase linearly with the amount of water. See for example the article here: <https://fellowproducts.com/blogs/learn/the-golden-ratio-for-brewing-coffee>

Greg Rundlett about BlueSpice

Greg Rundlett came to the following conclusion at the EMWCon in Houston: BlueSpice is really the best option out there - I think globally - for MediaWiki Enterprise, MediaWiki hosting and support.

Paul Arnoux commented "Coffee too strong"

Well. 6 grams of coffee per cup says the instructions. And the amount of powder increases linearly with the cups. By the way: If you squeeze out the last cup of coffee, you should cook a new one right away.
