Tour 2 [Integrated Management system](#)

next: [Process map](#)

An **Integrated Management System** (IMS) brings together various sets of rules that serve corporate governance. For example:

- Quality management (ISO 9001)
- Risk management (ISO 31000)
- Environmental protection and occupational safety management (ISO 14001 and ISO 45001).

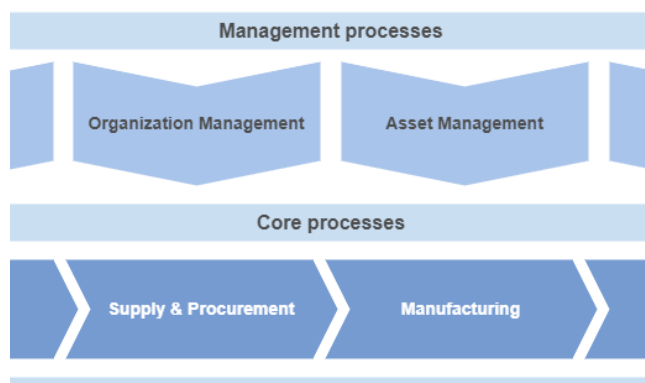

Management systems in a wiki

Wikis have established themselves as appropriate systems for the organization of management systems:

- *Central storage:* The rules and regulations are available centrally and online for all employees.
- *Search function:* Content can be quickly found via the search function and is perfectly pre-sorted via namespaces and categories.
- *Version-based editing:* Content can be edited and easily maintained in no time at all using a visual editor and forms.
- *Document control:* Templates, workflow and release functions ("control of documents") support the editorial processes.
