Tables

Tables

Tables have practical filter and sort options. For filtering and sorting, users can click on the respective header of a column in view mode. This function is not available in edit mode. Example of a filterable table:

Function	Value
Filterable table	functioning
Category check	n/a
Sortable table	functioning

Diagrams / Infographics

Diagrams

Flow charts, organizational charts, process maps, BPMN diagrams and more. Here is an example of an infographic created with the integrated drawio tool:

Videos

Videos

Video is of course also possible. Regardless of whether it is stored directly in the wiki or whether it runs on a common video service. Here is a test video uploaded to this wiki:

Page lists

Smartlist

With the integrated *Smartlist* extension, page lists can be easily created.

trim: Not a valid integer

Inputbox

Input boxes are practical tools for directing new pages to specific namespaces (wiki areas). A page that you create here is saved in the IMS namespace:

ⓘ pages/Inputbox Inputbox

</> Code documentation

ⓘ SyntaxHighlight

Code can be clearly displayed using the included extension *SyntaxHighlight*:

```
<?php
echo "Hello world!";
?>
```

RSS-Feed

ⓘ RSS-Feeds

Here is a feed from Bluespice.com. Can be formatted with or without a description.
