Tables

[Tables](#)

Tables have practical filter and sort options. For filtering and sorting, users can click on the respective header of a column in view mode. This function is not available in edit mode. Example of a filterable table:

[Diagrams](#)

Flow charts, organizational charts, process maps, BPMN diagrams and more. Here is an example of an infographic created with the integrated drawio tool:

Videos

[Videos](#)

Video is of course also possible. Regardless of whether it is stored directly in the wiki or whether it runs on a common video service. Here is a test video uploaded to this wiki:
