

Sandbox

A selection of standard built-in content elements - this is how you breathe life into the wiki!
Switch to edit mode to edit the page yourself.

Contents

1	Tables	2
2	Diagrams / Infographics	2
3	Videos	2
4	Page lists	2
5	Inputbox	2
6	Code documentation	3
7	RSS-Feed	3
8	Emoticons	3
9	CountThings	4
10	Category tree	4
11	Tag cloud	4
12	Widgets	4

📊 Tables

[\(i\) Tables](#)

Tables have practical filter and sort options. For filtering and sorting, users can click on the respective header of a column in view mode. This function is not available in edit mode. Example of a filterable table:

Function	Value
Filterable table	functioning
Category check	n/a
Sortable table	functioning

📈 Diagrams / Infographics

[\(i\) Diagrams](#)

Flow charts, organizational charts, process maps, BPMN diagrams and more. Here is an example of an infographic created with the integrated drawio tool:

📺 Videos

[\(i\) Videos](#)

Video is of course also possible. Regardless of whether it is stored directly in the wiki or whether it runs on a common video service. Here is a test video uploaded to this wiki:

<https://en.demo.bluespice.com/wiki/File:gizmo.mp4>

☰ Page lists

[\(i\) Smartlist](#)

With the integrated *Smartlist* extension, page lists can be easily created.

trim: Not a valid integer

🔍 Inputbox

[\(i\) pages/Inputbox Inputbox](#)

Input boxes are practical tools for directing new pages to specific namespaces (wiki areas). A page that you create here is saved in the IMS namespace:

</> Code documentation

Code can be clearly displayed using the included extension
SyntaxHighlight:

[\(i\) SyntaxHighlight](#)

```
<?php
echo "Hello world!";
?>
```

RSS-Feed

Here is a feed from Bluespice.com. Can be formatted with or without a description.

[\(i\) RSS-Feeds](#)

How to track decisions with BlueSpice

Every day, managers make decisions and reach resolutions in companies. How do you keep track of them, even if they have been written down, e.g. in a protocol? **BlueSpice** offers the solution.

Der...
