Tables

Tables have practical filter and sort options. For filtering and sorting, users can click [Tables](#) on the respective header of a column in view mode. This function is not available in edit mode. Example of a filterable table:

Function	Value
Filterable table	functioning
Category check	n/a
Sortable table	functioning

Diagrams / Infographics

Flow charts, organizational charts, process maps, BPMN diagrams and more. Here is an example of an infographic created with the integrated drawio tool: [Diagrams](#)

Videos

Video is of course also possible. Regardless of whether it is stored directly in the wiki or whether it runs on a common video service. Here is a test video uploaded to this wiki: [Videos](#)

Page lists

With the integrated *Smartlist* extension, page lists can be easily created. [Smartlist](#)

- [MediaWiki:CustomMenu/Header](#)
- [Electric Pallet Truck Alligator](#)
- [Main Page](#)
- [Sandbox](#)
- [Widget:Weather](#)
- [Regensburg](#)

Inputbox

Input boxes are practical tools for directing new pages to specific namespaces (wiki areas). A page that you create here is saved in the IMS namespace:

Code documentation

Code can be clearly displayed using the included extension *SyntaxHighlight*:

```
1<?php
2echo "Hello world!";
